

Muhammad Bin Imran

Full Stack Web Developer — Laravel · Go · REST APIs

hello@muhammadbiimran.online github.com/muhammadbinimran linkedin.com/in/muhammadbinimran

SUMMARY

Full stack web developer focused on building fast, dependable products end to end — from database schema to the pixels a user touches. Core toolkit is Laravel and Go, backed by clean REST APIs and MySQL, with Tailwind and vanilla JavaScript on the front end.

EXPERIENCE

Senior Full Stack Developer

2023 — Present

Freelance / Contract

- Delivered Laravel and Go applications for clients across fintech and logistics.
- Designed REST APIs consumed by mobile and web clients simultaneously.
- Owned deployment pipelines from staging through to production on Linux/Nginx.

Full Stack Web Developer

2021 — 2023

Software Agency

- Built and maintained client-facing web platforms end to end in Laravel and MySQL.
- Introduced a Tailwind CSS design system, cutting frontend delivery time significantly.

SELECTED PROJECTS

Invoicely

Laravel · Livewire · MySQL

SaaS invoicing platform with subscription billing, PDF generation, and a client portal.

Fleetpulse

Golang · WebSockets · Redis

Real-time fleet tracking API built in Go, handling 10k+ concurrent socket connections.

EDUCATION

BS Computer Science

2019 — 2023

Focused coursework in data structures, databases, and networked systems.

TECHNICAL SKILLS

PHP Laravel Go MySQL Redis REST APIs WebSockets JavaScript Tailwind CSS Docker Nginx

Linux
